

Planning a Product

Lesson 13 – Expert Coding in Minecraft with JavaScript

1. What is an ordered and intentional development process?
2. What is an exploratory development process?
3. What are the factors that would help determine what type of development process to use?
4. What is an iterative development process?
5. What is an incremental development process?

6. What are the 4 phases of the development process?

7. What does the investigating and reflecting step involve?

8. What are program requirements in the investigating and reflecting phase?

9. What are some of the ways you can perform the investigation phase?

10. What is the design phase of the development process?

11. What tasks are often included in the design phase?

12. What is the prototyping phase of the development process?

13. What is the purpose of prototyping?

14. What is the testing phase of the development process?

15. What should testing include?

16. Why is the investigating phase so important?

17. Why is the design phase so crucial?

18. Why is the prototype phase important?

19. Why is the testing phase important?
